

Astonishing Results

Obtained by PSYCHOPATHIC DOCTORS

In Their Private Offices at Windsor Hotel, 52 Fairfield Ave., Bridgeport.

PATIENTS TRULY THANKFUL

Patients Given Up By Their Physicians and Pronounced Hopeless, Are Cured By Them.

Scientists stand amazed at the extraordinarily rapid advance that has been made in the treatment of disease through the recent remarkable development and progress of what is known as natural healing, which has swept over the American continent, leaving however, comfort, light and hope behind, instead of darkness, misery and woe. No longer is it necessary that an intelligent man or woman should suffer in body or mind; no longer need we be a race of invalids and dose ourselves to death with poisonous drugs in futile efforts to obtain relief from multiplying pains and ills that modern modes of life have thrust upon us. The Psychopathic Doctor, who administers both to the body and the mind diseased, without the use of poisonous drugs. It has taken 1800 years for mortal man to develop a medicine that fully exacts science, though wonderfully simple in its application and yet wonderful in its effects.

The Psychopathic Doctors do not claim to have invented anything or to have made anything new. They have simply discovered one of the natural laws which govern the restoration and preservation of health in the human body, utilizing the power God gave to man for the cure of disease. It is an ideal, vital essence of life, nerve force and vital energy. Psychopathy or Naturopathy as Dr. Blumer terms it in his book "The Psychopathic Method of Practice," is not the chance application of valuable forces attended occasionally by good results, but is the scientific application of health-giving influences that are always effective. It restores the organs of secretion, excretion and circulation to their normal condition; it lifts the patient out of his negative state, above his disease. It is a common sense treatment for all human ailments and is based upon scientific principles, and is designed to be sound, by scientists the world over.

It recognizes the intellectual and spiritual being controls the physical man, through this power it treats the nerve centers, and through these nerve centers every organ and part of the human body is an ideal combination of scientific, magnetic and vibratory healing. Psychic force, personal magnetism, mental science, psycho-therapeutics, bio-energetics and suggestive therapeutics, whereby the nervous system is thoroughly charged with new nerve force, the mind resumes its normal condition, the functions of the body, adding the lungs to purify and the heart to circulate the blood throughout the entire body. Remember perfect circulation means absolute perfect health.

History tells us that prehistoric man knew nothing of drugs or medicines of any kind. He was a doctor, learned and wise; yet lived to greater age than we, totally exempt from modern ills and pains. Dr. Blumer, the founder of Psychopathic Doctors, has made many astonishing cures. Some suffered from various forms of disease who could find no cure by other means, as they are only specialists in this State giving these treatments. If you desire taking advantage of their peculiar skill, which they freely demonstrate, come to the Windsor Hotel, where they have more time to enter into the details of difficult cases. Here every case is carefully examined, and a cure is possible, you are as sure of it as you are of the sun rising. If, however, you are beyond relief, no amount of money would induce these doctors to accept your case. Many are flocking to their offices daily for relief. Fully nine out of every ten who are treated by them are cured, the greatest number requiring only a few treatments.

And among the cures made, were many who had given up all hope of relief. Most eminent scientists, professors and physicians of the world admit that this is the acknowledged scientific treatment of the age. The treatment will convince the most discouraged. The best evidence of this is obtained by calling at the offices of the Psychopathic Doctor, where you can meet and hear from patients' lips of their miraculous recoveries from all manner of disease. Men, women and children are equally susceptible to these health-giving influences, and you have the positive assurance that no harm can come from these treatments. All who have taken their medicine, Greece seem to have different words of praise in regard to their methods. They still hold open the free consultation from 9 a. m. to 5 p. m. except Sunday, at the Windsor Hotel, where they will remain for a limited time only. Those desiring to learn more about the methods of these doctors should read the book entitled "The Revolution in Medical Practice," sold by Hayes & Betts, 923 Main Street, for 35c and 50c. This little volume has created a stir in literary circles and among thinking people.

A big company has been formed in London to exploit a new form of chrome leather, which it is claimed is made waterproof by working a rubber solution into its pores after it is tanned. A French chemist has figured it out that the oceans of the world carry 25,000 tons of radium in solution, while 1,000,000 tons are contained in the sediment on the floors of the Seven Seas. In the past four years Great Britain has led the world in the per capita consumption of sugar, with the United States a close second. Bulgaria, Greece and Spain are having the best and

AUTOBIOGRAPHY OF A BREAKER BOY

The Real Story of a Pennsylvania Youngster Whose "Days Is Mostly All Alike When the Mines is Workin'"—Fifteen Years Old and Been Working Since Ten.

SCOTT NEARING (Former Secretary Pennsylvania Child Labor Committee.) (Exclusive Service Charities and The Common Press Bureau.)

"What's that? What was I up to yist'day? I ain't sure I can remember it all, but I'll try. "My days is mostly all alike when mines is workin'." Ma and me lives in that there little log shanty with little Bill and Sissy. They goes to school, but none of them. Never learnt a thing in school. I didn't. There weren't no chance. The teacher was bum. When I went to school, it was in one door and out the other. "Yep. I'm fifteen now—been workin' in the breaker since I was ten. Days is mostly the same to me. Yes—'day mornin' I was a dreamin' away two-forty about our mine. We was playin' the Hortons and they was one ahead. I goes up to the bat and id soaks her for a homer and just as I feller that way, ain't it? It's a blamed sight. I ain't no better, but I was had a hair like some of the kids is. "So I gets up and puts on my clothes. That's the part I don't like to do. After you gets dirty, it don't make no difference, but it's pretty tough to get out of a decent bed and into them black mine-clo's. I ain't no better, but I was had a hair like some of the kids is. "There ain't nothin' else to tell you. Oh, yes, there was a Hunkie got killed on the track to-day. But that ain't nothin', our days is mostly alike here when the mines is workin'. There's Ma—a callin' now. I suppose she wants me to go to the store.—so long."

"Rose, Johnnie, rise. Don't you hear the bells a-ringin'? Johnnie, are you wakin'?" It is time to be alive in the mornin'. Continually keeps callin' Johnnie, are you wakin'?" It is half past five. "She sings that every mornin' to get me up. Pretty good of Ma, to wake a feller that way, ain't it? It's a blamed sight. I ain't no better, but I was had a hair like some of the kids is. "So I gets up and puts on my clothes. That's the part I don't like to do. After you gets dirty, it don't make no difference, but it's pretty tough to get out of a decent bed and into them black mine-clo's. I ain't no better, but I was had a hair like some of the kids is. "There ain't nothin' else to tell you. Oh, yes, there was a Hunkie got killed on the track to-day. But that ain't nothin', our days is mostly alike here when the mines is workin'. There's Ma—a callin' now. I suppose she wants me to go to the store.—so long."

NEWEST NOTES OF SCIENCE.

Seven hundred billion matches a year, it has been estimated, are consumed by American smokers. A new English steam launch, though 75 feet long, is only 19 inches when carrying a ten-ton load. During 1908 topographers of the Geological Survey mapped 25,994 square miles in 32 States and Territories. "Fossil" trees are being found in the forests of the country to a greater extent than lumbering operations. A State law in Victoria requires that 25 feet of air must be supplied to each worker in a mine. The distribution of hot springs in the United States coincides very closely with the distribution of the hot springs of the country over 700,000,000 per year. A German physician declares that red haired persons are more susceptible to consumption than those with darker hair. Half of Colombia's miners are women, working in the hydraulic operations, up to their waists, in water, bearing 100 lbs. on their heads. Government experts estimate that the Mississippi river carries off one-tenth of the total rainfall of the United States. Two Wisconsin men have been granted a patent on a device to be attached to a hen to register the number of eggs she produces daily. Since gold was discovered in the Klondike, about a decade ago, \$125,000,000 worth of the precious metal has been taken out.

The world's entire supply of the oil of bergamot comes from a small section of Calabria, fronting on the Adriatic. A new electrical machine in the Treasury at Washington counts 1,000 coins of any denomination a minute, and packs them in each. Rich diamond fields recently were discovered in German South Africa, bearing gems less than a foot from the surface of the ground. The nation's supply of stone suitable for the manufacture of cement and concrete mixtures is regarded as practically inexhaustible. Nine-tenths of human energy expended in muscular movement goes out at heat, but one-tenth being utilized for the work of the muscles. Automobile coal wagons, in which the box is lifted and dumped by the same motor that drives the vehicle, have been tried out in England. It has been estimated that if the flea could keep up his speed without being obliged to stop between jumps he could cover ten miles in a minute. During a severe storm at Hacketts-town, N. J., lightning struck the street lighting system, passing through 33 tungsten lamps, without burning them.

A New York electric light company is using a rotary pump mounted in the rear of an automobile and driven by its flywheel, to pump out flooded manholes. In training its cavalry recruits, the German army is making use of a machine, driven by electricity, in which all the movements of horses are simulated. A recently invented life-saving raft for use on Paris lakes frequented by skaters is supported by small balloons, so it will not sink should the ice break. For some unexplained reason 60-inch searchlights have proved unsatisfactory in the navy, and they have been abandoned in favor of the 30 and 36-inch ones. Incandescent lamps can be colored by dipping them in a solution of white shellac in denatured alcohol, to which has been added aniline dye of the desired hue. The brightest room under a single roof in the world is the passenger concourse of the new Union Station at Washington, having an area of 96,500 square feet. There is said to be \$1,000,000 worth of whalebone locked up in a single Massachusetts storehouse, held for a year or more, which are expected in the near future. The town of St. Albans, near London, uses no fuel except the town's refuse in its municipal electric plant, which contains four 75-kilowatt direct-current generators. Tungsten electric lamps are more efficient than those with carbon filaments for the reason that they can be operated at a higher temperature, producing greater brilliancy. A Government geologist has estimated the free water in the earth's crust as equal to a sheet over the entire surface about 96 feet deep, or about 41 times as much as the water in the oceans. In a new musical instrument, an Austrian invention, the pressure of piano keys brings strings into contact with a revolving band, producing music very much like that of a violin. Artificial grindstones, made of equal parts of Portland cement and quartz sand, have been satisfactorily used for a year in Wisconsin and Ontario glass works for grinding glass.
